To: All Parties

From: Whitehorse Urban Cycling Coalition

The Whitehorse Urban Cycling Coalition invites political parties in the territorial election to consider the following questions to help voters understand how your party stands on issues pertaining to cyclists and other active transportation users.

1. The demand for health care in Yukon continues to increase. What would your party do to improve illness prevention through active living? How would it mitigate the negative health effects of a car-oriented culture, such as obesity, traffic collisions, and respiratory ailments?
2. With nearly half of Yukon's greenhouse gas emissions coming from on-road transportation sources, how would your party reduce vehicle-related GHG emissions?
3. What would your party do to address road safety for all users across all modes of transportation, considering various ages and abilities?
4. The Alaska and Klondike Highways pass directly through or adjacent to the majority of Yukon communities. How would you improve the relationship between these highways and the adjacent communities?
5. What would your party do to promote and enhance cycling as an accessible transportation option for all Yukoners?

We invite you to respond to these questions, which will be shared with the WUCC's membership and interested voters. Please respond to this email, or call 332-9015 with questions. Thank you.

Sincerely,

Whitehorse Urban Cycling Coalition
