Re: Riverdale Community Association's Support for WUCC's Proposal to Develop a Cycling Master Plan

The Riverdale Community Association is pleased to indicate our support for the Whitehorse Urban Cycling Coalition's proposal to partner with the City to develop a cycling master plan. Riverdale is perfectly situated for increasing more active modes of commuting like cycling and walking. As the neighbourhood experiences backed-up vehicular traffic most weekday mornings and afternoons during the school year, it would benefit all of Riverdale to increase the ability of residents to cycle to work. It makes sense that the development of a cycling master plan would go some way to achieving that objective.

Please do not hesitate to contact us if we can provide further assistance.

Yours truly,

Niki Deneault
President
Riverdale Community Association
